AORI – DESIGN SYSTEM

ALL PRODUCT DATA PLACEHOLDER

WHAT THIS BOOK HOLDS

01	Philosophy & voice	03 – 05
02	Logotype — space, sizes, colourways, misuse	06 – 08
03	Colour — grounds, pigments, semantics, proof	09 – 12
04	Typography — faces, scale, setting	13 – 15
05	Illustration — painted, motifs, patterns, drawn	16 – 20
05b	Photography — the problem and the jobs	21 – 22
06	Iconography	23
07	Grid, surface, motion	24 – 25
08	Application — the component layer	26 – 27
09	In use — six channels, two products	28 – 29
10	Governance — tokens, the gate, extending	30

AORI is a design system, not a brand: the rules are the system's, and the worked examples speak in the voice of its flagship case — a handmade-jewellery workshop in Heraklion, real on Instagram, its product data invented and labelled so. A harbourside taverna is built from the same tokens to prove the system carries across products.

Everything visual is watercolour and gouache on cotton paper. Corner radius is zero, there are no shadows, and depth is a 2px carbon rule, a 1px hairline, or a flat pigment field — never a blur.

This book is generated from the repository — docs/brandbook/book.html is its source, and the live pages under guidelines/ carry the same rules with working demonstrations. Where the book compresses, the guideline page it names is the authority.

| *We make twelve. When they are gone we make something else.*

A WORKSHOP, NOT A BRAND STUDIO

The system exists to make one thing possible: a shop, a document or a post that looks like it came from a workshop rather than a brand studio. Its centre of gravity is the bench — things are made in small numbers, by hand, and the visual language keeps that honesty: paint instead of photography-gloss, arithmetic instead of superlatives, paper instead of chrome.

Three materials carry everything. **The paintings** — watercolour and gouache on cotton paper — are the loudest thing in the system and take the romance. **The clerical sheet** — stone ground, form-green ink, hairlines — takes the evidence: sizes, prices, shipping, specification. **The carbon line** draws everything functional: rules and icons; the spot register paints its service moments.

Every layout is a negotiation between those three, and the negotiation has rules — that is what the rest of this book is.

THE BENCH — THE CENTRE OF GRAVITY

THE VOICE IS A MAKER TALKING

PERSON

First person plural for the workshop, second person for the reader. Never "AORI is proud to present".

CASING

Sentence case in prose. Uppercase only in the annotation voice — labels, buttons, metadata — where it is always tracked. Display headings are uppercase and tracked; body copy never is.

NUMBERS ARE LOAD-BEARING

Twelve in a run. Four left. Silver 925. Two working days. The brand's honesty is arithmetic; numbers are stated plainly and never rounded up for effect.

SCARCITY IS STATED, NEVER SOLD

"Four left of twelve", not "Selling fast". A closed run says "All twelve gone" and keeps its page — the piece stays visible; only the price goes.

NO EXCLAMATION MARKS. NO EMOJI.

The one ornamental flourish in the brand is the decorative unicode rule in the Instagram bio, and it belongs to the bio only.

GREEK IS RESERVED FOR THE BRAND BOOK

Product surfaces are Latin only. Place names keep their Latin spelling: Psiloritis, Livyko, Elia, Knosos.

VERBATIM, FROM THE SYSTEM

Made by hand in Heraklion, in runs of twelve, and named after the places they came from.

Silver 925, hammered on the bench and left matte. Named for the beach below the village, where the water goes flat at six in the evening.

We will make more, but not the same.

The register test: if a sentence could open a perfume advert, it fails. If it could be said across the bench, plainly, to one customer, it passes.

WRITE LIKE THIS, NEVER LIKE THAT

THE MAKER SAYS

Four left of twelve.

All twelve gone. We will make more, but not the same.

Silver 925, hammered on the bench and left matte.

Two working days to Athens. Five to everywhere else.

One free resize, always.

Named for the mountain you can see from the bench on a clear morning.

THE BRAND STUDIO SAYS — NEVER THIS

Only a few left — selling fast!

SOLD OUT — don't miss the restock!

Premium artisanal silver, crafted with passion.

Lightning-fast shipping, worldwide!

Hassle-free returns guaranteed.

AORI is proud to present its exclusive new collection.

Each left-hand line states a number, a material, a place or a promise, and stops. Each right-hand line sells, exclaims, or speaks about the brand in the third person — three separate failures, and any one of them is enough.

ONE MARK, PAINTED ONCE

AORI wordmark, inkTerracotta
on stockPaper on
pigmentOlive on paper

THE ONLY MARK

The wordmark is a vector trace of painted lettering and is the only mark. It is never re-set in type, never redrawn, and no second mark may be invented.

EMBLEMS SIT UNDER IT

An emblem may seal a box or close a page, but it never replaces the name.

FOUR COLOURWAYS, CUT PLAIN AND WITH THE MACRON

The choice is decided by the ground, never by taste: ink on paper (the default, everywhere), terracotta on stock (packaging, cards), paper on pigment (hero bands only), paper on carbon (the media kit). The macron cut and the plain cut never appear together on one surface.

ONE PER SURFACE

A page, a post, a box face carries the mark once.

CLEAR SPACE AND MINIMUMS

THE UNIT IS X — THE CAP HEIGHT OF THE A

Nothing enters the margin of one X on all four sides: no type, no rule, no motif, no edge of page. On packaging and social crops the margin may fall to ½X, but never less.

MINIMUMS

220px	Hero and masthead
120px	Digital minimum — below this the painted edge breaks up
30 mm	The floor in print
< 120px	Favicons and avatars only: the reversed-R monogram emblem stands in

220px

120px

monogram

Type-set letters never substitute for the mark at any size above 28px. On a painting, the mark never sits directly — it sits on a plate, a paper or stock field with its own clear space, laid over or beside the painting. On a photograph, never: a photograph shows a piece; the mark stays on the layout.

EIGHT WAYS TO RUIN IT

× STRETCHED

× SQUEEZED TALL

× ROTATED

× SHADOWED

× RECOLOURED OFF-SYSTEM

× ON A GRADIENT

× ON A PAINTING, NO PLATE

× RE-SET IN TYPE

Nothing in the system sits on a gradient, so the mark never does either. The last one is the subtle failure: the painted letterforms are the identity, and a typeset "AÓRI" — however close the face — is a different brand wearing the same name.

GROUNDS — PLASTER, STOCK, STONE, CARBON

Lime plaster carries every page; toned stock is the paper the paintings are drawn on; stone is the clerical register; carbon is fresco black, thinned. Laid flat and opaque, never tinted, never gradiented. Maximum two background colours in any one document.

PAPER-100 · RAISED
#FDFAF4

PAPER-200 · THE PAGE

INK-600 · MUTED
· 5.23:1
#6E675C

INK-400 ·
DISABLED ONLY
#A79F91

The stone register takes anything administrative — sizing, shipping, order status, specification — with form-green ink and 1px hairlines. Ink-400 is contrast-exempt because it marks only disabled states; captions and hints take ink-600, never lighter.

THIRTEEN PIGMENTS, OUT OF THE PAINTINGS

Sampled by frequency from the plates themselves — the palette is not decoration-first. Four to six carry a composition; never more. **Terracotta acts, aegean links, saffron highlights.**

						
AEGEAN · THE SEA #1890A8	WATER · SHADOWED #006078	SHALLOW · THE SHELF #78C0C0	HAZE · DISTANCE #A8C0C0	TERRACOTTA · TILE, HULL #C05A28	CLAY · WARM MID #A87860	RUST · IN SHADOW #8A3A22
						
SAFFRON · KROKOS #C0A860	OCHRE · OLIVE BARK #907848	OLIVE · LEAF, SCRUB #5F7A46	FOREST · CYPRESS #34513C	UMBER #6B4426	SLATE · LIMESTONE #A8A890	

METALS — MATTE, NEVER A GRADIENT, NEVER A SHINE

				
GOLD	GOLD-DEEP	SILVER	SILVER-OXIDE	BRONZE

Ten legacy pigment aliases (—pigment-red, —scarlet, —teal...) still resolve for old markup. New work uses the names above; the aliases retire on a stated schedule.

THE PIGMENT MARKS, THE INK SPEAKS

ACTION — EACH THROUGH ITS INK CUT

ACCENT

#B04E20 · 4.97:1

ACCENT-HOVER

#A84A1E · 5.36:1

ACCENT-PRESS

#8A3A22 · 7.25:1

LINK

#117487 · 5.08:1

LINK-HOVER · FOCUS

#006078 · 6.67:1

LINK-VISITED

#6B4426 · 7.92:1

Hover darkens one step — the same direction as press. A pigment never lightens under the pointer. The painting pigments keep their full cuts for fields and illustration; the semantic layer takes the deep cuts so 13–17px text on and in them clears AA.

STATUS — PIGMENT FOR MARKS, INK FOR WORDS

STOP

WARM

CALM

GO

STOP-INK · 7.25:1

WARM-INK · 4.95:1

CALM-INK · 5.08:1

GO-INK · 8.23:1

Wherever a status colour becomes text — a notice label, an error line, a tag — it takes its ink cut, which clears 4.5:1 on paper. The full pigments stay on rules, fills and stamps, where 3:1 is the bar.

SOLD OUT

The rule wears the pigment; the label speaks in the ink.

PROOF — EVERY ROLE PAIR, MEASURED

PAIR	MEASURED	BAR
Body ink on the page	14.05:1	4.5
Captions and hints on the page	5.23:1	4.5
Clerical ink on stone	6.45:1	4.5
Body links	5.08:1	4.5
Hovered links	6.67:1	4.5
Visited links	7.92:1	4.5
Button label on accent	4.97:1	4.5
Button label, hovered	5.36:1	4.5
Button label, pressed	7.25:1	4.5

PAIR	MEASURED	BAR
Stop spoken as text	7.25:1	4.5
Warm spoken as text	4.95:1	4.5
Calm spoken as text	5.08:1	4.5
Go spoken as text	8.23:1	4.5
Error line on raised paper	7.44:1	4.5
Display type on the mount	11.84:1	4.5
Focus ring on the page	6.67:1	3.0
Carbon rule on the page	14.05:1	3.0
Accent fill against the page	4.97:1	3.0

Eighteen declared pairs, WCAG 2.x relative luminance, re-measured by tools/check_contrast.py on every run. A token edit that puts any pair under its bar fails the build — the rigor does not depend on who is paying attention.

THREE FACES, THREE JOBS

AΩ

GFS DIDOT — DISPLAY

Names, headings, prices. Uppercase, tracked .09–.14em. Greek-capable, which is why it won.

PSILORITIS · 185 €

Aa

COMMISSIONER — ANNOTATION & UI

Labels, buttons, metadata, nav. Always uppercase, tracked .055–.14em, weight 600.

FOUR LEFT OF TWELVE · ADD TO BAG

Aa

SOURCE SERIF 4 — BODY

Prose, descriptions, form values. Sentence case, 15–17px, line-height 1.7–1.75.

Hammered on the bench and left matte, named for the beach below the village.

All three are Google-hosted substitutions for the painted lettering until licensed faces arrive — the swap happens in `tokens/fonts.css` alone, and every one covers Greek as well as Latin. The runner-up direction (GFS Neohellenic) stays documented in `guidelines/font-candidates.html`.

Minimums: 24px type in a 1920×1080 slide, 12pt in print, 44px hit targets on touch surfaces. The system's monospace is the platform stack and appears only in documentation — never on a product surface.

THE SCALE, ALL ELEVEN STEPS

112 • 6xl

PLAY (shown at 64 – the poster size)

80 • 5xl

PSILORITIS

32 • 2xl

LIVYKO RING

25 • xl

FOUR RUNS

20 • lg

Body large — the standfirst under a heading.

17 • md

Body — running prose, product descriptions, form values.

15 • sm

Body small — dense prose, the clerical register's values.

13 • xs

CAPTION AND SMALL CONTROLS

11 • 2xs

THE SMALLEST ANNOTATION • NEVER BODY TEXT

Leading runs 0.95 (display) to 1.75 (body). Tracking: display .14em, titles

.09em, annotation .055em, prose .01em. Wide tracking on uppercase

display is the loudest signal in the brand — and body copy is never

tracked, never uppercase

SETTING THE PAGE

MEASURE

Prose measures 62ch; annotation columns 46ch. A line of body serif wider than that stops being a letter and starts being a wall.

HIERARCHY IS THREE LEVELS

A display heading, an annotation label, body prose. If a layout needs a fourth level, it is two layouts.

PRICES ARE DISPLAY

A price is set in GFS Didot with the name, never in the annotation voice — the number is part of the product's name, not its metadata.

THE CLERICAL REGISTER

Form labels are italic Source Serif or tracked annotation caps on stone; values are body serif. Nothing in the ledger is bold except an emphasised total.

NUMERALS

Tabular figures wherever numbers align — run counts, prices in a table, the line sheet.

ONE BLOCK, SET RIGHT

RUN OF TWELVE · FOUR LEFT

PSILORITIS · 185 €

Named for the mountain you can see from the bench on a clear morning. Twelve were made from one sheet of silver.

ADD TO BAG

THE PAINTED HAND

COVE

TAVERNA

GENERATIONS

NIGHT

Saturated fields held inside a drawn contour, the paper reading through the lighter passages, nothing opaque white, nothing greyed to recede. The full plate mounts on toned stock with a 5px unpainted margin, so it never floats — a painting is an object laid on the page, not a background.

ONE HAND

Every plate is the same hand. Commission new plates in it, or a new product starts from this library — the palette comes from the paintings, not the other way round.

A PAINTING OPENS THE SITE

A photograph never does. A collection tile is a *place*, so it is a painting; a product tile is a piece, so it is a photograph.

never loses a point of
contrast.

OLIVE · 8% — BEHIND PROSE

Applied as a ::before layer so the opacity never touches the text. Never
two patterns on one screen.

THE SPOT REGISTER

			
EMPTY-BAG	NO-RESULTS	LETTER-SENT	RUN-CLOSED
			
BENCH	POLISH-CLOTH	KEEP-DRY	POUCH

THE THIRD JOB OF THE ONE HAND

Eight small paintings grown by the seeded engine in tools/spot-painter.html — washes, pooled edges, granulation, a drawn contour. They claim no provenance from the plates.

SERVICE, NOT ROMANCE

Empty states, care and sizing instructions, transactional email, booking confirmations. A drawing never opens a page and never sits beside a painted plate — the painting wins.

SIZES AND COLOUR

96px standard, 64px minimum, 160px maximum. Never recoloured, never given a background of its own.

WORDS BESIDE IT

The annotation line under a drawing says the thing plainly: "All twelve gone." "Keep above the water."

THE MOTIF LAW HOLDS

No drawn octopus, no drawn sun, no drawn spiral. Motifs stay paintings; drawings depict objects from the bench and the shop.

THE EMPTY STATES, SET AS THEY SHIP

THE BAG IS EMPTY

Nothing kept here yet. The current runs are on the collections page.

NOTHING BY THAT NAME

Try a place — Psiloritis, Livyko, Elia, Knosos — or browse all four runs.

ALL TWELVE GONE

This run is closed and stays on its page. We will make more, but not the same.

The care card (page 28) runs the other half of the set — polish-cloth, keep-dry, pouch — as instructional spots at 64px with annotation heads. That pairing, drawing plus plain words, is the register's whole grammar.

Live specimen and full rules: guidelines/spot-register.html. The set is authored in-repo and flagged as made-here in `docs/PROVENANCE.md` — provenance stays honest.

THE PHOTOGRAPHY PROBLEM

The paintings are the loudest thing in the system: maximum chroma, hard contour, white paper. Every treatment that makes a photograph quieter moves it *further* from them. So the question is not "what filter" — it is which of four routes the workshop commits to. **The decision is still open**, documented in full at [guidelines/photo-blending.html](#).

ROUTE 1

PAINTINGS ARE THE PRODUCT IMAGERY

Photographs live only on a plain spec panel.

Cost: free

ROUTE 2

HAVE THE PIECES PAINTED

Send the artist the actual jewellery.

Cost: artist time

ROUTE 3 · RECOMMENDED NOW

SHOOT ON THE PAINTED PAPER

Lay pieces on a real painted sheet in daylight.

Cost: one afternoon

ROUTE 4

MAKE THE SPLIT THE IDENTITY

Painted world for romance, clerical sheet for evidence.

Cost: free

Recommendation: route 3 now, route 2 over time. Nine positions on how a photograph may sit beside a painting are rendered live at [guidelines/illustration-library.html](#) §04.

Untreated regardless of route: sizing and fit shots, the one detail shot showing hallmark and finish, and anything sent to a stockist or a magazine. Photographs go full bleed with no border — a border reads as a frame, and the brand does not frame things. The eight photography paths in this repository hold generated placeholder tiles that say so on their face.

IMAGE JOBS — WHICH PICTURE GOES WHERE

SURFACE	PAINTING	PHOTOGRAPH
Home hero	Yes	Never — a photograph does not open the site
Collection grid tile	Yes, 3:4	No — a tile is a <i>place</i> , not a piece
Product grid tile	No	Yes , square
Product hero and gallery	No	Yes

The table is the peace treaty between the two image worlds: paintings own the places and the romance, photographs own the pieces and the evidence, and no surface belongs to both. When a layout wants both, they sit in separate registers — a painted hero above, an untreated spec panel below — never blended.

SURFACE	PAINTING	PHOTOGRAPH
Sizing, shipping, spec	No	Yes , untreated
Packaging	Yes	Never
Instagram place post	Yes	No
Instagram product post	No	Yes

Paintings keep the toned mount and the 5px unpainted margin everywhere they appear. Photographs go full bleed, no border, no treatment beyond the shoot itself. Full reasoning and edge cases: [guidelines/image-jobs.html](https://aori.com/guidelines/image-jobs.html).

SIXTEEN MARKS, ONE CONSTRUCTION

CONSTRUCTION

24px grid, 16px keystone, the system's 2px carbon rule: butt caps, mitre joins, square corners, currentColor. One deliberate solid — the seal's centre dot.

NEVER ALONE, NEVER DECORATING

An icon never carries meaning alone — the word sits beside it — and an icon never decorates a layout.

THE TWO SETS NEVER TRADE

Motifs are paintings and decoration with provenance; icons do the interface jobs. A motif never acts as a control; an icon never stands where a painting should.

INSIDE DENSE TEXT

The typographic characters + - · / remain fine in running copy; every control-surface job belongs to the drawn set.

UNPAINTED PAPER IS THE LAYOUT

SPACE — 4PX BASE

4 · 8 · 12 · 16 · 24 · 32 · 48 · 64 · 96 · 128 · 176. Page margins are deliberately large — the paintings are surrounded by unpainted paper, and the layout should be too.

MEASURES & SEMANTICS

Prose measure	62ch
Annotation measure	46ch
Plate gutter	24px
Plate-to-caption gap	12px
Control padding	12 × 24px
Card padding	24px
Page margin / wide	64 / 128px

EDGE & DEPTH

Corner radius is zero, everywhere. Cards are a 1px inset hairline on paper-400 or a flat paper-100 panel — no border-radius, no drop shadow, no coloured left border except the notice's status rule. The one transparency in the system is a gradient scrim over a hero painting.

RESTRAINED TO THE POINT OF NEAR-ABSENCE

DURATIONS

instant	80ms
fast · colour	140ms
base · fades	220ms
slow	420ms
page	700ms

Opacity and position only, standard ease. No bounce, no spring, no scale-on-hover, no parallax, no scroll-triggered reveals. Reduced motion collapses every duration to zero.

INTERACTIVE STATES

HOVER

The underline appears, or opacity lifts .62 → 1. On a pigment field the pigment darkens one step — never lightens.

PRESS

Darkens one more step and travels 1px. Nothing shrinks.

FOCUS

A 2px deep-water outline, offset 3px so it lands on the paper. Never removed.

DISABLED

text-faint on paper-300, no pointer — the one job text-faint has.

THE STATES, DRAWN

REST

HOVER — ONE STEP DEEPER

PRESS — RUST, 1PX TRAVEL

A5 RUN CARD

CARE CARD

WHOLESALE LINE SHEET

Screen, print, social and email, every one composed from the same tokens, registers and rules: paintings for the places, photographs for the pieces, the clerical sheet for the arithmetic, and the spot register for the service moments. Nothing is styled per-channel; the channel only chooses which registers it needs.

Sources live in cases/ and render from styles.css alone. Every collection, price and run count is invented and labelled placeholder — the honesty rules of the voice apply to the system's own documentation too.

THE PROOF — A SECOND PRODUCT, NOTHING RESKINNED

HARBOURSIDE TAVERNA – WEBSITE HOME

The taverna is entirely fictional, and that is the point: it was built from the same tokens, registers and rules with nothing reskinned. The palette came from the paintings; the display face carries the menu the way it carries the runs; the ledger register prices the fish the way it prices the silver.

WHAT TRANSFERRED UNTOUCHED

Type, colour, icons, rules, spacing, motion, components — the entire token layer and everything built on it.

WHAT EACH PRODUCT SUPPLIES

Its own paintings (or a commission in the same hand), its own words in the maker's voice, its own arithmetic.

THE RECIPE

Start from this library, let the palette come from the paintings, keep the registers. If a choice needs a new rule, the rule joins the system — not the product.

HOW THE SYSTEM STAYS HONEST

TOKENS ARE THE SOURCE OF TRUTH

194 custom properties in `tokens/*.css` — colour, type, spacing, shape, elevation, motion, patterns, surfaces. `tools/build_tokens.py` regenerates the machine-readable `tokens.json`; the CSS is edited, the JSON never is.

```
$ python3 tools/build_tokens.py
tokens/tokens.json: 194 tokens
$ python3 tools/check_contrast.py
All 18 pairs clear. The gate is open.
```

THE GATE

Every colour role is a declared pair with a WCAG bar (page 12). The gate re-measures all of them on every run and fails the build when a token edit puts one under its bar. Add a pair whenever a token takes on a new text job — the list is the accessibility contract.

AGENTS ARE FIRST-CLASS

`SKILL.md` makes the repository a Claude Code skill; every component's `.prompt.md` is its contract for generated use.

OPEN DECISIONS

PHOTOGRAPHY ROUTE

1, 2, 3 or 4 (page 21). Blocks the shop pages from being real.

LICENSED FACES

The three faces are Google-hosted substitutions; licensed files swap in via `tokens/fonts.css` alone.

THE WORDMARK ORIGINAL

The trace is used flat; the full-size painted artwork is still wanted.

THREE UNPAINTED MOTIFS

A spiral, a hoop and a beaded strand painted as marks would complete the disc set.

This book is generated from the living system — tokens, guidelines and cases in the repository are the source of truth, and the contrast gate measures every colour role on every run. The workshop is real; every collection, price and run count shown is invented and labelled placeholder.
